Contact List

A Python App Based on SQLite3 and Tkinter

Languages Used

- Python 3
- SQL

Requirements

- Python 3 with `Tkinter` enabled
- Runs on any `platform` or `OS` supported by Python

Installation

- This is a `Python3` app and has no external dependencies other than the standard library.

- To use this app anyone can either use the **binary** or just by executing the **.Py** file

- In case of **Virtual Environment** user should install `datetime` module from Pypi

  ```
  > pip install datetime
  ```

- Then just run the app using the Command

  ```
  > python Contact_list.py
  ```

Building a binary using PyInstaller

- First install PyInstaller from PyPi

  ```
  > pip install PyInstaller
  ```

- Then Just run

  ```
  > pyinstaller -F --noconsole Contacts_list.py
  ```

- This will generate the binary in `dist` folder in the same directory

Frameworks Used

- Tkinter
- SQLite3
